PROFESSIONAL SUMMARY

Motivated Information Science Engineering student with hands-on experience in software development, web technologies and AI/ML applications. Skilled in Java, Python, JavaScript, MERN Stack, SQL and REST APIs with a strong foundation in DSA, OOPs and DBMS. Experienced in building real-world projects through internships, hackathons and collaborative environments. Passionate about problem-solving, learning technologies and developing innovative software solutions.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, C, C++, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Express.js, REST APIs, CRUD Operations, Django

Databases: MySQL, Oracle SQL, MS SQL Server, DBMS

AI/ML & Data Analytics: Machine Learning, NLP, Deep Learning, Data Analysis, Sentiment Analysis, Power BI

Tools & Platforms: Git, GitHub, Postman, VS Code

Core CS: Data Structures & Algorithms, OOPs, DBMS, Computer Networks, Operating Systems

Other Skills: Problem Solving, Team Collaboration, Communication, Analytical Thinking, Adaptability, Leadership

PROJECTS

Resume Analyzer | Python, Flask, NLP, NLTK, Machine Learning

[Link](#)

- Developed a Python-based web application to analyze resumes and generate job-matching insights
- Implemented NLP techniques for keyword extraction, resume parsing, and structured data processing
- Designed backend APIs and optimized processing workflows for efficient data handling
- Improved resume evaluation efficiency through automated analysis and structured processing

Student Record Management System | C++

[Link](#)

- Developed a student management system supporting CRUD operations and structured data handling
- Implemented modular components using object-oriented programming principles and database concepts
- Optimized record storage and retrieval workflows for efficient data management operations
- Improved data organization and system maintainability through structured backend logic design

Expense Tracker Application | MongoDB, Express.js, React.js, Node.js, REST APIs

[Link](#)

- Built a full-stack expense tracking application with modular frontend and backend architecture
- Developed RESTful APIs for structured data management and transaction handling
- Implemented debugging and validation workflows to improve application reliability and maintainability
- Enhanced usability and system organization through scalable CRUD-based operations

EXPERIENCE

AI Intern – Learner's Byte | [Link](#)

Jan 2026 – May 2026

- Participated in AI-focused internship training involving Python and problem-solving concepts
- Improved understanding of real-world software development practices and technical problem-solving

EDUCATION

RV Institute of Technology and Management

Bangalore, Karnataka

B.E. in Information Science and Engineering, CGPA: 8.75

2022 – 2026

CERTIFICATES

- **Java Programming Fundamentals** 📄 : Covered core Java concepts and object-oriented programming
- **Cisco Networking Basics** 📄 : Completed – Core networking concepts and protocols
- **HackerRank SQL (Intermediate)** 📄 : Certified in SQL queries, joins, subqueries and aggregations

ACHIEVEMENTS & LEADERSHIP

- **Expression-Derived Music Recommendation System** 📄 : Published in IJSREM Journal
- **SBI Life Hack-AI-Thon 2024** 📄 : Participated in SBI Life Hack-AI-Thon 2024
- **Startup Ignition Cell** : Design Team Member at RVITM
- **Organizing Committee (RVITM)**: Assisted in planning and coordination of technical events
